

AHAD MEHDI KHAN

ISO 27001 LEAD AUDITOR - GRC ANALYST

CAREER SUMMARY

3rd Year BS. Software Engineering with a strong interest in **Governance, Risk, and Compliance**. Studied **ISO 27001:2022 and NIST CSF 2.0**, and **Completed GRC Mastery** training under Abed Hamdan (Unix Guy), Certified ISO 27001 Lead Auditor . Carries a background in web security auditing, penetration testing fundamentals using Kali Linux and Software development, which adds a **practical technical dimension** to compliance work. A genuinely **curious individual** – willing to learn anything and pick up whatever the role demands.

EDUCATION

BS Software Engineering
Virtual University
2024 – 2028

Intermediate – Comp. Sci.
Punjab College, Islamabad
2022 – 2024 | 86%

CORE SKILLS

- ISO 27001:2022
- NIST CSF 2.0
- Gap Assessment
- Risk Assessment
- Audit Report Writing
- Kali Linux
- Web Vulnerability Assessment
- Python (Automation)
- Computer Networking
- Operating Systems
- LLMs and APIs
- Policy Writing
- MS Office

PROJECTS & EXPERIENCE

○ ISO 27001 ISMS Design & Implementaion

GRC Mastery Program | ISO 27001 · Policy Writing · Risk Audits 2026

- Designed and Implemented a full ISMS based on ISO 27001 using the skills learned in the ISO 27001 Lead Auditor Certification.
- This was the Program as a part of practical learning inside the GRC Mastery under the Guidance of Abed Hamdan.

○ NIST CSF Implementation and Audit

GRC Mastery Program | NIST · Security Audit · Policy Writing 2026

- Designed and delivered a full organizational cybersecurity program structured around the NIST Cybersecurity Framework.
- Conducted an internal security audit – assessing existing controls, documenting gaps, and producing structured audit findings.

○ Web Security Audits

TCW Security | Kali Linux · Burp Suite · Nmap · Nikto 2023 – 2025

- Performed security assessments on live websites using Kali Linux tools; identified vulnerabilities across authentication, configuration, and input handling.
- Produced structured audit reports with findings categorised by severity and actionable remediation steps.
- Published sanitised reports on LinkedIn and GitHub as portfolio evidence.

SOFT SKILLS

- Analytical Thinking
- Critical Thinking
- Curious & Eager to Learn
- Communication
- Problem Solving
- Adaptability
- Team Collaboration
- Time Management

PERSONAL STATEMENT

From the first line of code I wrote to the latest compliance framework I mapped, curiosity has driven everything. I constantly try to keep up — I dig in, break things apart, and rebuild until I understand them fully. Whether it is a security control, a framework clause, or a new tool, I will learn it. GRC is where I have chosen to plant myself, but I bring the mindset of someone willing to go wherever the problem is.

FANG – ISO 27001 Gap Assessment Pipeline

TCW Security | Python · OpenRouter · ReportLab

2026 – Present

- Designed and built an end-to-end gap assessment tool: Google Form intake, CSV scoring engine (Yes / Partial / No / Don't Know), LLM-generated narratives across four report sections, and automated 8-page PDF output.
- Demonstrates direct application of ISO 27001:2022 controls, audit methodology, and professional report writing.
- Project is available on GitHub. (Private Repo)

Web Pentesting Orchestrator -Apex Engine

TCW Security | Python · WSL · ReportLab · LM Studio

2026 – Present

- Designed the Prototype End-to-End Web Penetration Testing Orchestrator, Apex Engine, inspired by Shannon and PentestGPT.
- Demonstrates direct application in accelerating penetration testing and professional report writing.
- Project is available on GitHub. (Private Repo)

TECHNICAL SKILLS

Kali Linux & Security Tools

Hands-on experience with Kali Linux and its toolset: Nmap, Burp Suite, Nikto, Dirb/Gobuster, Metasploit (fundamentals), Wireshark. Applied in web vulnerability assessments and network reconnaissance.

GRC Automation

Built Python-based tooling for ISO 27001:2022 gap assessments: CSV scoring engine, LLM-generated narratives, and automated PDF report output using ReportLab.

Web Security Auditing

Performed security assessments on live web applications; identified vulnerabilities including misconfigured headers, exposed admin panels, and injection points. Produced structured audit reports with findings and remediation steps.

Policy Writing & Documentation

Created and Managed Documents from code documentation to Governance, Risk and Compliance in Cyber Security. Created reports in Penetration Testing, Web Security Audits and Policy Writing in ISO 27001 Implementation and NIST Framework.

Risk Assessment & Treatment

Conducted structured information security risk assessments aligned to ISO 27005 – asset identification, threat/vulnerability analysis, likelihood/impact scoring, and risk treatment planning.
